Forecast for Friday 26 Jul 2024

Weather: Early hill fog may be slow to clear in the west, particularly around Ben Alder, so expect some poor visibility here until mid-morning. Otherwise, the day will be bright with sunny spells along with an increasing risk of sharp showers. Thunderstorms are possible. Showers fading into the evening.

Chance of cloud-free hill tops above 800m: 40% in the west at first, otherwise 80%.

Low cloud and visibility: Extensive above 600-800m in the west through morning, but this will lift reliably to leave most slopes fog free through the day. However, sharp showers will obscure nearby slopes and bring some cloud to munro level but this should be fairly short-lived.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Met Office Aberdeen Meteorologist's View
Note the 'feels like' temperature above munro level is close to freezing. Best conditions east of the A9.

Forecast for Saturday 27 Jul 2024
Weather: A fine, bright morning will give way to a few scattered showers interspersed with periods of sunshine. Showers likely to be less heavy than previous days and will fade more quickly into the evening to leave some late sunshine.

Maximum wind: Southwest veering west 15-25mph.

Chance of cloud-free hill tops above 800m: 90%

Low cloud and visibility: Low cloud expected to be confined to any heavier showers and this may descend to munro level temporarily. Away from showers, excellent visibility is expected.

Temperature: **Glens:** 10 Celsius rising to 15-17 Celsius.
At 800m: 6 Celsius rising to 10 Celsius.
Freezing level: Well above summits.
